Team Agility for Everyone – It's Not Just for Software Anymore

Curious about Agile? Wondering how Agile might benefit your delivery teams, even if they don't write code? Explore the world of Agile without the technical jargon, software war stories, or framework dogma. Teams have successfully used Agile ways of working everywhere from schools to nonprofits to Hollywood films to rock climbing gyms. In situations where teams need to collaborate to deal with unexpected change, ambiguous requests, and fast-moving fire-drills – Agile may help your teams get more done, delight more customers, and find greater satisfaction in their jobs.

As the foundation for ICAgile's Agile Delivery suite of courses, this highly interactive course is appropriate for anyone who wants to learn more about Agile.

Course Content:

- Context for Agile in Business
    - Why Agile – benefits, challenges & myths of Agile
    - The Agile Manifesto & Principles
    - Agile mindset & learning organizations
- Agile in a Nutshell – Key Patterns for Success
- Agile Roles & Responsibilities
    - Common roles on Agile teams & alternative approaches
    - Defining & involving the customers and end-users
    - What about managers & stakeholders?
- Agile Practices & Events for Value-Driven Development – Requirements, planning, working, feedback & improving how work is done
- Agile Tools – backlogs, task boards & information radiators
- Tying it All Together – Experience the roles, activities and outcomes of an Agile team through a group project planned, developed and delivered during the course

Learning Outcomes:

- Describe the origin of Agile and its values, principles and mindset in everyday business language.

- Define how roles and work processes shift on an Agile team

- Explain how Agile teams self-organize and incrementally deliver pieces of value more quickly than traditional approaches that rely on more management direction

- Evaluate how frequent collaboration and feedback with customers help Agile teams deliver better products and services.

- Practice Agile approaches to planning, estimating, and reporting work.

- Explain the importance of frequent feedback in Agile and how it can be used to improve the product, processes and customer satisfaction.

- Select opportunities to experiment with Agile ways of working personally, as well as potentially with your team at work.

You Receive:

- An immersive virtual learning experience facilitated by a highly respected instructor

- Access to supporting workshop material

- Continuing Education: Scrum Alliance: 16 Scrum Education Units (SEUs) & PMI: 14 Professional Development Units (PDUs)

Designed for:

Anyone curious about incorporating Agile ways of working into their business or work

Team members and leaders launching new Agile Teams
